

Different Fires require different extinguishing agents

● Class A - things that leave ash
ex. wood, paper, cloth
use water

Class B - things that boil
ex. gas, oil, hot grease
do not use water!
use CO_2 or Dry chemical extinguisher

Class C - electrical fire
● shut off all power supply then use
water or CO_2

Class D - metals that burn
ex. magnesium
leave the area, metal will burn up.
use Dry chemical extinguisher
